Preamble

1) Introduction

MASTER IN HUMAN RESOURCE DEVELOPMENT (MHRD) is a 2-year Full-time Master's Degree Program of, Jamnalal Bajaj Institute of Management Studies, University of Mumbai.

Businesses are continuously in search of professionals for understanding the new organization and changing needs of people. Corporate world is in search of innovative HR professionals who can change the context of the organization, people and contribute to nation building. This requires a different kind of mind-set, technical as well as behavioral competencies and value systems. With MHRD Program in JBIMS, we are committed to create new generation of HR professionals who can be the Change Leaders and Change Management Catalysts.

In the revised curriculum of MHRD, the AICTE Model Curriculum standards have been considered by integrating pertinent new topics into the program. Additionally, adherence to the National Higher Education Qualification Framework 2023 (NHEQF 2023) and National Education Policy 2020 (NEP 2020) principles, which place a strong emphasis on developing skills through projects and practical work that outlines the goals and learning outcomes for each topic also have been taken into consideration. The curriculum has incorporated the opportunity for multiple entry and multiple exit based on NHEQF guidelines. This curriculum places a high focus on qualitative, quantitative and analytics techniques for aiding the students in comprehending corporate practical knowledge.

2) Aims and Objectives

In order to ensure that Human Resource Management students are able to attain necessary levels of industry relevant knowledge, skills and practical outlook, it is necessary to incorporate emerging industry practices in instructional process. The students are also expected to benefit from short- term live projects, field projects, On-the-job training opportunities, industry internships and research projects as these can provide students an understanding of the industry environment and working methods. It is also increasingly expected to that management studies should be able to equip the Human Resource Management students to launch their own start-ups and to become entrepreneurs. Hence, in view of above, the curriculum of Master in Human Resource Development (MHRD) becomes pertinent.

3) Learning Outcomes

- PO1: Apply knowledge of Human Resource Management theories and practices to solve business problems
- PO2: Foster analytical and critical thinking abilities for data-based decision-making in Human Resource Management
- PO3: Ability to develop value-based leadership
- PO4: Ability to provide innovative solutions to problems in the fields of HRM.
- PO5: Ability to lead themselves and others in the attainment of organizational goals contributing effectively to team environment

Elective Courses (Any One)					
1	Elective	Entrepreneurship and Innovation	2	30	IA
2	Elective	Diversity Equity Inclusion and Belongingness	2	30	IA

Suggested Workshops

Semester II:

- Advanced Software Tools: Power Bi, Tableau, R Programming, SPSS
- Interpersonal effectiveness

Mandatory Course 1: Research Methodology

Course Credits: 4

Course Outcomes:

- CO1: Identify research problem and develop research hypothesis on the basis of review of literature and research design (Understand and apply L2, L3)
- CO2: Construct the research process which includes research flow charts and organize the various attitude & measurement scales, Questionnaire design, and various sampling techniques (Apply, L3)
- CO3: Understand the methods of data collection with application in different research designs and demonstrate knowledge for proper sampling design and data processing methods (Understand, L2, Apply L3)
- CO4: Apply modern statistical tools as univariate& bivariate analysis, Chi-square, and ANOVA to analyze and to evaluate the data applying critical thinking abilities for given research problems/questions (Apply, Analyze and Evaluate, L3, L4, L5)
- CO5: Prepare and Analyze/Evaluate various research reports maintaining ethical practices to solve business problems. (Analyze L4, Evaluate L5, Create, L6)

Unit / Module	Content	CO Mapping	Hours Assigned
1	Introduction to Research: What is research, objectives of research, types of research, difference between basic and applied research, research approaches, criteria for good research, research methods vs research methodology, Social research, social research approaches. Research applications in social and business sciences, and research process.	CO1	3
2	Research Problem, Literature review and Formulation of Research Hypotheses: what is research problem, problem selection, necessity of defining the problem, Management Decision Problem vs Management Research Problem; Problem identification process; Components of the research problem; Objectives of literature review, Use of literature review, search for	CO1	4

	related literature, reading the literature, importance of literature review, sources of literature, literature review gaps, Types of Research hypothesis, and important terms. Writing research proposal- Contents of a research proposal		
3	Research Design: Nature and Classification of Research Designs, need for research design, features of a good design, research design frame work, Induction and deduction, Dependent, independent variables. Exploratory research design, descriptive, diagnostic research design, Experimental research design.	CO1	4
4	Sampling: Sample design, Sampling design process, sampling and non-sampling errors, types of sampling (probability and non-probability), sample vs census, sample size decision. Determination of Sample size- Sample size for estimating population mean, Determination of sample size for estimating the population proportion	CO2, CO3	7 [3 hours session + 4 hours field work for the selected research topic]
6	Data collection and Data processing: Data collection: Primary Data; Observation methods, survey methods, questionnaire, process of questionnaire, Types of Questionnaires, Process of Questionnaire Designing; Advantages and Disadvantages of Questionnaire Method. Pilot survey, sample questionnaire, difference between questionnaire and schedule. Interviews: types of interviews. Secondary data; classification of data (internal and external data), research authentication (Methodology check and accuracy check) Data processing: Editing Field Editing (centralized in house editing) Coding- Coding Closed ended structured Questions, Coding open ended structured Questions;	CO2, CO3	7

	Classification and Tabulation of data. Data cleaning, data adjusting. [Use of SPSS/EXCEL/JASP in Activity Based Learning is encouraged]		
7	Univariate and Bivariate Analysis of Data: Descriptive vs inferential analysis, descriptive analysis of univariate data (Missing data, analysis of multiple responses, grouping large data), descriptive analysis of bivariate data (cross-tabulation), calculating rank order, data transformation. Microsoft EXCEL: Working in the spreadsheet, creating a worksheet Reliability test- Cronbach alpha [Use of SPSS/EXCEL/JASP in Activity Based Learning is encouraged]	CO4	7
8	Testing of Hypothesis: Concepts in Testing of Hypothesis – Steps in testing of hypothesis, Test Statistic for testing hypothesis about population mean; Tests concerning Means- the case of single population; Tests for Difference between two population means; Use of SPSS in testing Hypothesis. Parametric and non-parametric test Z-test, t-test, f-test, One sample test, Two independent sample test, two related samples test. [Use of SPSS/EXCEL/JASP in Activity Based Learning is encouraged]	CO4	4
9	Analysis of variance: The ANOVA techniques, basic principles, one-way ANOVA, two-way ANOVA, ANOCOVA, MANCOVA [Use of SPSS/EXCEL/JASP in Activity Based Learning is encouraged]	CO4	3
10	Chi-Square Tests: Chi square test for the Goodness of Fit; Chi square test for the independence of variables; Chi square test for the equality of more than two population proportions [Use of SPSS/EXCEL/JASP in Activity Based Learning is encouraged]	CO4	2

11	Data analysis: Statistical analysis, multivariate analysis, correlation analysis, regression analysis, Principal component analysis. Cluster Analysis [Use of SPSS/EXCEL/JASP in Activity Based Learning is encouraged]	CO4	6
12	Research Report Writing and Ethics in research: Need for effective documentation, types of research report, report preparation and presentation, report structure, general tips for writing research report, presentation of data, bibliography and references. Guidelines for presenting tabular data, Guidelines for visual Representations. Meaning of Research Ethics; Clients Ethical code; Researchers Ethical code; Ethical Codes related to respondents; Responsibility of ethics in research Plagiarism check and understanding consequences of unethical practices [Suggested Activity Research paper writing; Use of Plagiarism software]	CO5	6
13.	Research ThemeBased Research Papers/ Presentation	CO5, CO6	6

Mandatory Course 8: OJT / Field Project

Course Credits: 4

Course Outcomes:

- CO1: Apply concepts learned in classrooms to real-world work environments, enhancing their understanding and skills.
- CO2: show insights into the challenges, opportunities, and culture of different workplaces, preparing them for future employment.
- CO3: Use and appreciate the use of emerging technologies and their applications, enhancing their technological literacy and adaptability.
- CO4: Display problem-solving abilities in making informed decisions in complex scenarios through practical situations.
- CO5: Build ability to work in teams and collaborate to achieve common goals in diverse work environments through collaborative projects.

On-the-job training course / Field Projects offer students the chance to develop essential skills that employers highly value. These include communication skills, problem-solving abilities, teamwork, and adaptability. By working in a professional environment, students gain valuable experience that enhances their employability. They also learn to navigate professional environments, manage responsibilities, and overcome challenges. This experiential learning fosters independence, confidence, and self-awareness, which are essential for success in both career and life. Furthermore, students get a first-hand look at various industries and career paths. This exposure allows them to explore different fields, understand industry trends, and identify areas of interest. OJT / Field Projects provide the students opportunities to practice skills and apply their knowledge under the most realistic conditions possible, which are the actual job conditions. The OJT work conducted in direct connect with industry should be minimum of 60-80 hours during the Semester.

- The OJT Guidelines applicable of University of Mumbai will apply for OJT component.
- The field project will be completed and assessment will be undertaken as per the Project Assessment guidelines in the syllabus.

An OJT course in general sets out to achieve objectives such as:

1. Align classroom learnings with workplace outcomes.
2. Provide students with real-world work experience and align their expectations with job demands.

3. Combine physical and digital learning modes in industry settings, blended with mentorship.
4. Foster research skills, including knowledge discovery, analytical tools, methodologies, and ethical conduct.
5. Introduce students to emerging technologies and their applications in various fields.
6. Strengthen students' entrepreneurial skills and encourage job creation.
7. Facilitate problem-solving, decision-making, teamwork, and collaboration.
8. Foster social awareness and philanthropic values among students.
9. Encourage collaboration between Higher Education Institutes (HEIs), industry, and academia for internships and research opportunities.
10. Instill professional principles, ethics, values, and integrity to meet employment market demands and social needs.

MHRD Program - Guidelines under 10-point grading system

- The MHRD degree program shall be of two years duration consisting of Four (04) Semesters.
- The semester examinations for the Master of Management Studies will be held at the end of every semester i.e. at the end of Semester I, Semester II, Semester III and Semester IV.
- The Semester I examination will be held in the Second half of the academic year in which the learner was admitted (i.e. November/December)
- Semester II examination will be held in the first half of the calendar year (April/May)
- The Semester III examination will be held in the Second half of the academic year (i.e. November/December)
- Semester IV examination will be held in the first half of the calendar year (April/May) respectively.

Examination / Assessment and Grading:

(I) Mode of Assessment of Theory courses:

- Semester wise performance assessment of every registered learner is to be carried out through various modes of examinations. These include Internal Assessment and End Semester Examination.
- Internal Assessment includes class tests, home assignments based on live problems, course projects & presentations either in a group or individually, any other innovative assessment methods.
- The weightage of Internal Assessment and End Semester Examination is 40 and 60 percentage respectively.
- The Relative weightage for Internal Assessment is typically 40 percent and will be evaluated by the faculty as per his/her Teaching Learning Plan submitted at the beginning of the academic year.
- The end semester examination will be held at the end of the semester planned by the Institute and the relative weightage for this would be 60 percent.
- The end semester examination will normally be of 2 hours duration and will cover the full syllabus of the course. The end semester examination is mandatory.
- The grade for theory courses can be awarded only after successful completion of both Internal Assessment and End Semester Examination of the respective course.

(II) Mode of Evaluation of Projects

- If the performance of a student is to be evaluated through a Project work for any course, then End Term Examination (written) may not be suitable method of evaluation. The project evaluation to be done as per the following guidelines keeping the ratio of Internal and External Viva

Examination and presentation in ratio of 50:50

- The learner (individual / Group) to be given a Project (Problem or a situation) for which he needs to Prepare the solution. This Project is to be graded, at the end of the respective semester.
- The projects are supervised or guided, and need regular interaction (at least once a week) with the mentor/guide.
- Learner has to submit a project report and defend it in front of a panel of examiners. Panel of examiners for Project evaluation will be appointed by Head of Department/Institute.
- The project report will not be accepted if learner does not complete the project successfully and submit report on or before the deadline given for the project submission.
- The grade for Project can be awarded only after successful completion of Term Work and Oral Presentation / viva-voce as per the schedule.

(III) Mode of Evaluation of OJT

- If the performance of a student is to be evaluated through an On-the-Job training, then End Term Examination (written) may not be suitable method of evaluation. The project evaluation to be done as per the following guidelines keeping the ratio of Internal and External Viva Examination and presentation in ratio of 50:50
- The learner will work on on-the-job project which will be supervised or guided through regular interaction (at least once a week) with the mentor/guide.
- Learner will submit an OJT project report and defend it in front of a panel of examiners. Panel of examiners for Project evaluation will be appointed by Head of Department/Institute.
- The project report will not be accepted if learner does not complete the project successfully and submit report on or before the deadline given for the project submission.
- The grade for Project can be awarded only after successful completion of Term Work and Oral Presentation / viva-voce as per the schedule.

(IV) Grading of Performance

The program will have 10-point grading system. The illustrative Grade Table is as follow

Table 1: Grade Allocation under 10-point grading scale

Range of percentage of Marks	Letter Grade	Grade Point	Performance	SGPA / CGPA Range
80 and above	O	10	Outstanding	9.51 – 10
75-79.99	A+	9	Excellent	8.51 – 9.50
70-74.99	A	8	Very Good	7.51 – 8.50
65-69.99	B+	7	Good	6.51 – 7.50
60-64.99	B	6	Fair	5.51 – 6.50
55-59.99	C	5	Average	4.51 – 5.50
50-54.99	P	4	Pass	4.0 – 4.50
Below 50	F	0	Fail	< 4
Absent	AB	0	Fail	

A learner who remains absent in any form of evaluation/examination, letter grade allocated to him/her should be AB and corresponding grade point is zero. He / She should reappear for the said evaluation/examination in due course.

(V) SGPA/ CGPA Calculation

Semester Grade Point Average (SGPA):

- The performance of a learner in a semester is indicated by a number called Semester Grade Point Average (SGPA).
- The SGPA is the weighted average of the grade points obtained in all the courses by the learner during the Semester. For example, if a learner passes five courses (Theory/Projects etc.) in a semester with credits C1, C2, C3, C4 and C5 and learners grade points in these courses are G1, G2, G3, G4 and G5 respectively, then learners' SGPA is equal to:

$$\text{SGPA} = \frac{C1G1 + C2G2 + C3G3 + C4G4 + C5G5}{C1 + C2 + C3 + C4 + C5}$$

The SGPA is calculated to two decimal places. The SGPA for any semester will take into consideration the "F or AB" grade awarded in that semester. For example, if a learner has failed in Course 4, the SGPA will then be computed as:

$$\text{SGPA} = \frac{C1G1 + C2G2 + C3G3 + C4*\text{ZERO} + C5G5}{C1 + C2 + C3 + C4 + C5}$$

Cumulative Grade Point Average (CGPA):

- An up-to-date assessment of the overall performance of a learner from the time s/he entered the University of Mumbai is obtained by calculating a number called the Cumulative Grade Point Average (CGPA), in a manner similar to the calculation of SGPA.
- The CGPA therefore considers all the courses mentioned in the curriculum/syllabus manual, towards the minimum requirement of the degree learner have enrolled for.
- The CGPA will be calculated for the completed academic year/s as follows:
 - Semester I & II
 - Semester I, II, III & IV
- The CGPA will reflect the failed status in case of F grade(s), till the course(s) is/are passed. When the course(s) is/are passed by obtaining a pass grade on subsequent examination(s) the CGPA will only reflect the new grade and not the fail grades earned earlier.

Illustration of Computation of SGPA and CGPA:

Computation of SGPA and CGPA:

- The SGPA is the ratio of sum of the product of the number of credits with the grade points scored by a student in all the courses taken by a student and the sum of the number of credits of all the courses undergone by a student, i.e. $SGPA (S_i) = \frac{\sum (C_i \times G_i)}{\sum C_i}$

where C_i is the number of credits of the i th course and

G_i is the grade point scored by the student in the i th course.

- The CGPA is also calculated in the same manner taking into account all the courses undergone by a student over all the semesters of a program, i.e.

$$CGPA = \frac{\sum (C_i \times S_i)}{\sum C_i}$$

where S_i is the SGPA of the i th semester and

C_i is the total number of credits in that semester.

- The SGPA and CGPA shall be rounded off to 2 decimal points and reported in the transcripts. A Successful learner who has passed in all the courses of each Semesters i.e. Semester I, Semester II, Semester III and Semester IV shall be awarded grades as shown in the table given below:

Grade Table: Grade Allocation under 10-point grading scale.

Range of percentage of Marks	Letter Grade	Grade Point	Performance	SGPA / CGPA Range
80 and above	O	10	Outstanding	9.51 – 10
75-79.99	A+	9	Excellent	8.51 – 9.50
70-74.99	A	8	Very Good	7.51 – 8.50
65-69.99	B+	7	Good	6.51 – 7.50
60-64.99	B	6	Fair	5.51 – 6.50
55-59.99	C	5	Average	4.51 – 5.50
50-54.99	P	4	Pass	4.0 – 4.50
